FOR ETHICAL, ENVIRONMENTAL AND CLIMATE REASONS
- GRETA THUNBERG

Which GRETA are you today?

JOIN THE CLIMATE SAVE MOVEMENT
Our mission is to preserve the health of the planet by phasing out fossil fuels, ending animal agriculture and fishing and reforesting the earth to draw carbon out of the atmosphere.

"I AM VEGAN"
FOR ETHICAL, ENVIRONMENTAL AND CLIMATE REASONS
- GRETA THUNBERG
**OUR PLANET IS DYING. WE NEED TO TAKE ACTION.**

“Our house is on fire. I want you to act as if the house was on fire, because it is.”

“We are not in school today. You are not in work today. Because this is an emergency and we will not be bystanders.”

At the third Global Climate Strike in Montreal, in front of an audience of half a million people, Greta spelled out the dire future of our planet if we don’t commit to a profound and sustained change in our behaviour.

These calculations, says Greta, “also rely on my generation, your generation, sucking hundreds of billions of tons of CO2 out of the air with technologies that barely exist. And not one single time have I heard one politician, journalist or businessman even mention these numbers. They say let children be children. We agree. Let us be children. Do your part. Communicate these kinds of numbers instead of leaving the responsibility to us.”

**GO VEGAN. IT’S A BIG PART OF THE SOLUTION.**

Greta does not consume or use animal products for both ethical and environmental and climate reasons. Greta has two rescued dogs, who she loves spending time with.

Did you know?

Animal agriculture is responsible for at least 14% of greenhouse gas emissions - more than the combined exhaust from all transportation! Animal agriculture doesn’t just contribute to greenhouse gases. It also harms the planet because it creates water pollution, biodiversity loss, acid rain, coral reef degeneration and deforestation.

In addition to being vegan, Greta also stopped flying and shopping for anything that isn’t essential. Greta made her parents feel guilty about their role in the planet’s ongoing destruction until they too stopped flying and became vegan, along with Greta’s sister, Beata.

"No one is acting as if we were in a crisis. Even most scientists and green politicians keep on flying around the world eating meat and dairy."

**BELIEVE. “WE ARE THE CHANGE AND CHANGE IS COMING.”**

“The main solution however is so simple that even a small child can understand it. We spend 1,000 times more on global fossil fuel subsidies than on nature-based solutions.” The Climate Save Movement also calls for an end to animal agriculture subsidies and a transition to a plant based food system.

“The world is waking up. Change is coming, whether you like it or not. The bigger your carbon footprint is, the bigger your moral duty. We are changing the world, and we will never stop fighting. We will do everything in our power to stop this crisis. The eyes of all future generations are upon you.”

**“ACTIVISM WORKS, SO ACT.”**

Greta started a school strike in September 2018 calling on politicians to take urgent climate action. Now Fridays for Future student strikes take place on Fridays around the world. A few times a year there are global strikes. The fourth Global Strike is November 29, 2019 – days before the 25th UN climate summit. It is important to keep this momentum going – reaching more people and amplifying the message until real change is underway.

**The Greta Effect:** A slow-down in air travel and increase in environmental activism seen in the wake of Greta’s rise in popularity. Now go vegan, and add that to the Greta Effect!
